

2011 SORC North bound

Posted by ehpantera - 2011/08/16 03:46

Just got back to Ct and have the result of my run North bound. I averaged 107.956 mph. A bit slow compared to others but now I have a better idea as to how to plan for next year. As of Sun morning when we left, Jim Wallace's South bound run had not been calculated. There were numerous restarts due to mechanical failures and one Mustand upside down in the ditch. Driver walked away. We look foward to seeing what comes up with the Speedvision exposure. 4 to 6 weeks away.

Mark Skwarek & Jim Wallace
